SUMMARY

Logistics Technology and Business Applications Professional with 10+ years of experience supporting Container Freight Station (CFS), logistics, and supply chain operations through enterprise applications, ERP systems, Office 365 administration, data governance, and operational technology solutions. Proven expertise in Oracle R12 administration, logistics application support, Office 365 management, master data governance, import/export operational systems, user training, business process optimization, and digital transformation initiatives. Experienced in bridging business operations and technology to improve operational efficiency, system reliability, user adoption, and business continuity. Skilled in managing mission-critical applications, supporting logistics operations, implementing enterprise systems, coordinating technology-driven process improvements, and enabling seamless collaboration across operational and technical teams

EXPERIENCE

Senior Executive - IT & Logistics Technology

Pristine Logistics & Infraprojects Limited (SICAL)

05/2022 - Present

- Managed mission-critical applications for Container Freight Station operations, ensuring seamless logistics workflows.
- Administered Oracle R12 and master data, improving compliance and operational efficiency.
- Led Office 365 administration to enhance communication reliability and user security.
- Delivered training and documentation to enhance technology adoption and process efficiency.
- Collaborated with operations to improve system utilization and logistics application performance.
- Managed GST compliance via ERP configuration for regulatory adherence and accurate data management.
- Supported large-scale logistics operations through technology-enabled business applications.

Executive - IT Operations & ERP Support

Sical Logistics Limited

08/2016 - 04/2022

- Administered Oracle Forms and enterprise applications, managing supplier and customer master data with improved data quality and reporting accuracy.
- Enhanced user productivity through diligent application support and comprehensive end-user training programs.
- Executed data validation and correction activities ensuring high data integrity across systems.
- Supported continuous operation and IT infrastructure for logistics and trucking business systems.

Sales Representative

Krishna Agency

12/2015 - 06/2016

- Managed regional sales and customer relationships
- Coordinated distribution activities and vendor interactions
- Developed commercial understanding of supply chain and customer operations

PROJECTS

CFSMAG Application Migration & Implementation

2024

- Spearheaded the successful implementation and migration of the CFSMAG logistics platform, coordinating with business users, vendors, and operational teams to configure workflows, validate data, conduct user training, resolve critical issues, and ensure uninterrupted CFS operations during the transition from legacy systems.

GST Compliance & ERP Integration

- Played a key role in GST implementation within the Oracle ERP environment by managing tax validations, maintaining compliance-driven master data controls, supporting IRN and e-invoicing processes, and ensuring adherence to regulatory reporting requirements through accurate data governance and system validation.

Import & Export Data Synchronization

- Managed Import General Manifest (IGM) uploads, data validation, and logistics system synchronization processes, ensuring accurate import/export data processing, improved operational visibility, seamless information flow across CFS operations, and uninterrupted support for logistics workflows and regulatory compliance.

EDUCATION

Executive Post Graduate Certificate Program In General Management

Indian Institute of Management Visakhapatnam (Pursuing)

2026 - 2027

Bachelors in Computer Application - Computers

Thiruvalluvar University

2015

SKILLS

Logistics Technology

Container Freight Station (CFS) Operations, Logistics Systems Support, Import & Export Operations, Supply Chain Technology, Operational Technology Support, Process Digitization, Logistics Process Optimization

Enterprise Applications

Oracle R12 (AR/AP), Business Applications Support, ERP Administration, Master Data Management, Data Governance, User Access Management, Business Process Support

Digital Operations

Office 365 Administration, Mail Flow Management, User Administration, Security Administration, Application Migration, Digital Transformation, Technology Enablement

Functional & Business Support

User Training, Stakeholder Management, Process Documentation, Business Requirement Understanding, Cross-Functional Coordination, Operational Reporting, Process Improvement

Business Applications

Oracle R12, CFSMAG, ERP Systems, Master Data Management

Productivity & Collaboration

Microsoft Office 365, Outlook Administration, Mail Flow Management

Operations & Analytics

Data Analysis, Operational Reporting, Process Documentation, Performance Monitoring

Logistics & Supply Chain

CFS Operations, Import & Export Operations, Logistics Processes, Supply Chain Support

TECHNICAL SKILLS

Business Applications

Oracle R12, CFSMAG, ERP Systems, Master Data Management

Productivity & Collaboration

Microsoft Office 365, Outlook Administration, Mail Flow Management

Operations & Analytics

Data Analysis, Operational Reporting, Process Documentation, Performance Monitoring

Logistics & Supply Chain

CFS Operations, Import & Export Operations, Logistics Processes, Supply Chain Support
